

Artificial Turf for Football according:

FIFA* FIFA** EN15330-1 NFP90112 ÖISS DIN 18035-7

Football

Type	UNO / SAND / RUBBER
Composition	100% Polyethylene Monofilament Yarn
Available in	40, 50 or 60 mm pile height Latex Coating 2-tone Green
Certified according	FIFA*, EN 15330-1, NFP90112

- Two tone Polyethylene Monofilament Yarn
- Super-soft Polymer to limit likelihood of abrasions
- Little Splitting of the yarn up to 20.000 cycles
- Triangular-shaped yarn assists in maintaining overall resilience
- Dense yarn construction for increased coverage & a green looking pitch
- Excellent price vs quality ratio

Type	MAXIMUM / SAND RUBBER
Composition	100% Polyethylene, UV resistant quality Monofilament Yarn
Available in	40 & 65 mm pile height Polyurethane or Latex Coating 2-tone Green, sports green and Olive Green
Certified according	FIFA* FIFA** EN15330-1 NFP90112 ITB Nordic ÖISS DIN 18035-

- Two tone polyethylene monofilament yarn
- Approx. 300 µ, extra wide profile with spine reinforcement down the middle
- Dedicated polymer with unparalleled abrasion resistance for a product in this product segment
- Largely reduced splitting of the yarn up to 20.000 Lisport cycles
- Ingenious cross section for remarkable resilience of the yarn up to 20.000 Lisport cycles
- Approx. 300 µ extra wide yarn with spinal column for extended ball roll control
- Special polymer for unrivaled soft touch combined with hard wearing
- Two tone extra wide yarn for increased coverage (green-looking pitch)
- Sharply priced monofilament product with high coverage index
- Playing characteristics remain longer in place when installed onto a shock pad
- Pile heights between 40-65mm to suit different concepts
- PU backing with ecological benefits available offering superior tuft lock and improved turf durability, even in wet conditions

Football

Type	MAXIMUM Si / SAND RUBBER
Composition	100% Polyethylene Monofilament Yarn
Available in	40, 45, 50 & 60 mm pile height Polyurethane or Latex Coating 2-tone Green
Certified according	FIFA* FIFA** EN15330-1 NFP90112 ÖISS DIN 18035-7

- Two tone Polyethylene Monofilament Yarn
- Super-soft Polymer to limit likelihood of abrasions
- Little Splitting of the yarn up to 20.000 cycles
- Triangular-shaped yarn assists in maintaining overall resilience
- Dense yarn construction for increased coverage & a green looking pitch
- Excellent price vs quality ratio

Type	MAXIMUM Si NON INFILL
Composition	100% Polyethylene, UV resistant quality Monofilament Yarn
Available in	32 mm pile height Polyurethane Coating 2-tone Green
Certified according	FIFA* FIFA** EN15330-1 NFP90112 ITB Nordic ÖISS DIN 18035-

- The next generation in football quality built upon the excellent and unrivaled
- The success is based on its uniquely engineered polymer & revolutionary yarn shape. Brings yarn and tuft design together to offer long term features ... the easy way. The strength of the 2-tone yarn combined with the dense sward slows compaction and allows the yarn to stay upright, maintaining excellent playing characteristics.
- Makes installation easier, quicker and more economical. No infill means less maintenance. Lower maintenance costs means money for other investments. No rubber infill means it's more ecological and it feels more natural. It's as close as you can get in terms of a natural feel and look !
- The playing conditions remain consistent; teams can play all year round irrespective of weather conditions.
- The turf comes with an ecological polyurethane backing for a superior tuft lock and improved turf durability, even in wet conditions. A fibreglass primary backing ensures perfect dimensional stability.
